

Dynamics 365

Supply Chain Management

Microsoft Dynamics 365 Supply Chain Management provides manufacturers, distributors, and retailers with the real-time visibility and intelligence they need to move from reactive to proactive operations. It unifies data and uses predictive insights from AI and IoT—across order fulfillment, planning, procurement, production, inventory, warehousing, and transportation—to maximize operational efficiency, product quality, and profitability.

"With Dynamics 365, I feel like I have my hands on all the levers of the business at once. I have total visibility into our data, and I understand exactly what that data is showing me at all times."

> **Carl Spackman** Copper State Bolt and Nut Co. Vice President of Finance

Key benefits

Innovate with intelligent manufacturing operations Bring speed, agility, and efficiency to your manufacturing to connect and optimize production planning, scheduling, operations, and cost management.

Streamline your supply chain planning and logistics Maximize customer satisfaction and drive profitability by optimizing material sourcing, fulfillment, and logistics.

Modernize your warehouse and asset management Manage inventory and assets with precision using machine learning-enhanced guidance that recommends optimal inventory volumes, optimizes asset deployment, and streamlines processes.

Key capabilities

Manufacturing

Drive intelligent operations through a connected factory that uses IoT, AI, machine learning, and mixed reality to optimize people, processes, and equipment. Intelligent inventory management tools more accurately predict demand and optimize resources, while flexible, automated workflows accelerate product delivery and help ensure product quality and consistency.

Supply chain

Use unified data from across the value chain to gain enhanced visibility into operations and make more informed decisions. Simplify the procurement processes by using a single application to manage contracts, vendors, and monitor on-time delivery performance. Accelerate fulfillment with order routing based on availability and capacity constraints across companies, sites, and warehouses.

Warehouse management

Get end-to-end visibility into your warehouse operations, and more effectively manage the capacity, consumption, and movement of your raw materials and finished goods. Use intelligent warehouse management and automation capabilities to optimize put-away activities, storage across stock rooms and distribution centers, and accelerate pick-pack-ship activities to increase capacity and reduce fulfillment times.

Asset management

Track and strategically deploy assets to increase productivity and improve the overall equipment effectiveness of your mission-critical assets. Maximize the longevity and performance of high-value assets while reducing costs and production downtime by more effectively predicting and planning maintenance; and simplify maintenance with a single solution that supports multiple types of maintenance, including predictive, corrective, condition, and preventative maintenance.

Why Microsoft?

Roll out a powerful ERP application to get real-time information on almost any device, at any time. Leverage unmatched rapid and scalable deployment options that offer you the best of both worlds (cloud and on-premises) to meet today's global business requirements, and have the flexibility to adapt with ease as your business needs evolve. Simplify and accelerate business process changes, seamlessly integrate with legacy systems, and scale globally at your own pace.

Dynamics 365

Transform how you do business. Capture new opportunities across your organization when you bring people, data, and processes together with Microsoft Dynamics 365 intelligent business applications that help you manage and run your entire business while better engaging customers.

Better together

- **Finance**: Modernize your global financial operations to maximize financial visibility and profitability
- **Retail**: Drive retail operations and delight customers with exceptional shopping experiences
- **Talent**: Attract, engage, and grow talent to achieve high-impact, sustainable business results
- Field Service: Turn service calls into a strategic advantage with super-charged scheduling and predictive services
- **Customer Insights**: Get relevant insights to better understand and engage with customers
- Sales: Turn relationships into revenue by bringing digital intelligence into each deal
