

Dynamics 365

Finance

Microsoft Dynamics 365 Finance is Microsoft's financial management business application that enables medium-sized and enterprise organizations to monitor the performance of global financial operations in real-time, predict future outcomes, and make data-driven decisions to drive growth. It empowers users to do business anywhere, anytime, with an intuitive user-interface personalized for their role and preferences.

Key benefits

Drive strategic decisions with AI

Assess the health of your business, improve financial controls, optimize cash flow, and make strategic decisions faster to drive growth by using real-time, unified global financial reporting, embedded analytics, and predictive insights.

Unify and automate your financial processes

Integrate and automate your core business processes with financials to maximize user productivity and financial performance.

Reduce global financial complexity and risk

Quickly adapt to changing financial requirements with a rules-based chart of accounts and a no-code configuration service that simplifies regulatory and tax reporting, e-invoicing, and payments.

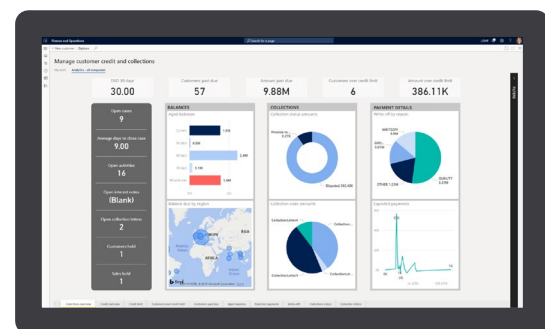

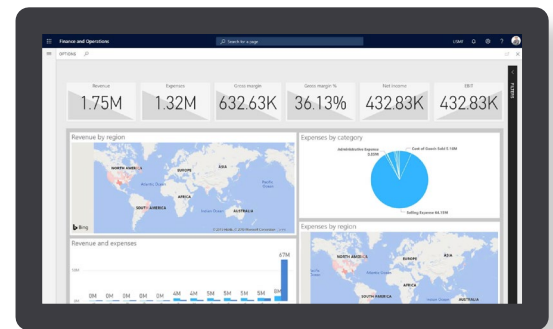

"Dynamics 365 assisted in speeding up our closing process—we've reduced the time by approximately 40 percent."

Paolo Fabiocchi
Group Chief Financial Officer
Frette

Key capabilities

Insights and strategy

Gain visibility into the financial health of your business with role-based workspaces that help drive accountability, efficiency, and growth. Deep data and process integrations across Dynamics 365, Office 365, and partner applications offer a centralized source of information that saves time, facilitates collaboration across your organization, and enables faster, more informed decisions.

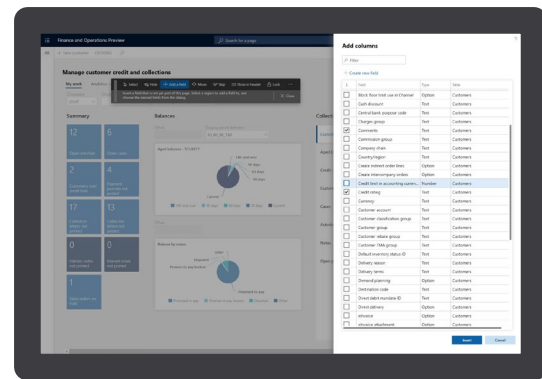

Process and productivity

Get more done with customizable workspaces, Office 365 integrations, and intelligent tools that help you prioritize and automate tasks. Use predictive insights and proactive guidance to effectively manage credit and collections processes, close books faster, and simplify global financial management with in-depth reporting capabilities, financial intelligence, and embedded real-time analytics.

Performance and growth

Increase profitability and cash flow with predictive recommendations and proactive guidance for timely customer payments. Increase efficiency across the business with financial process automation, budget control, and financial planning tools; and expand faster—whether optimizing across subsidiaries, acquiring companies, or growing organically—with rapid deployment across 37 countries and 42 languages.

Compliance and risk

Leverage credit management tools that minimize risks while delivering flexibility and control for global organizations. Automate revenue forecasting, allocation, recognition, subscriptions, and renewals, and reporting through a rule-based event handling process that enables your business to comply with accounting standards, including IFRS 15 and ASC, and to accurately and effortlessly calculate and report your financial statements.

Why Microsoft?

Roll out a powerful ERP application to get real-time information on almost any device, at any time. Leverage unmatched rapid and scalable deployment options that offer you the best of both worlds (cloud and on-premises) to meet today's global business requirements, and have the flexibility to adapt with ease as your business needs evolve. Simplify and accelerate business process changes, seamlessly integrate with legacy systems, and scale globally at your own pace.

Dynamics 365

Transform how you do business. Capture new opportunities across your organization when you bring people, data, and processes together with Microsoft Dynamics 365—intelligent business applications that help you manage and run your entire business while better engaging customers.
